

Project Design Phase

Problem – Solution Fit Template

Date	18 JULY 2026
Team ID	
Project Name	A Comprehensive Measure of Well - being
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

- ☐ **Understand the existing situation in order to improve it for your target group.**

Section	Description
Customer Segment	Students, Researchers, Government Policymakers, NGOs, Data Analysts
Customer Problem	Users find it difficult to analyze and compare the Human Development Index (HDI) of different countries because the required indicators are scattered across multiple sources and require manual calculations.
Current Alternatives	UNDP reports, World Bank data, spreadsheets, manual calculations, online articles.
Pain Points	Time-consuming analysis, scattered data, difficult country comparison, lack of an interactive prediction tool, manual interpretation of HDI indicators.
Proposed Solution	Develop a web-based HDI Predictor using Python, Flask, and Machine Learning that allows users to select a country and instantly view its development indicators, predicted HDI score, and HDI category.
Key Features	Country selection, automatic retrieval of indicators, HDI prediction using Linear Regression, display of Life Expectancy, Education Indicators, GNI per Capita, and HDI Category.
Value Proposition	Provides a fast, accurate, and user-friendly platform to predict and analyze the Human Development Index without requiring manual calculations or technical expertise. Saves time, improves decision-making, enables easy country comparison, supports research and policy analysis, and enhances understanding of global development.

Problem–Solution Fit Summary (Writing Block)

Expected Benefits	Many students, researchers, and policymakers face difficulties in understanding and comparing the Human Development Index (HDI) because the required indicators such as life expectancy, education, and income are available across different sources and require manual analysis. A Comprehensive Measure of Well-Being addresses this challenge by providing a machine learning-based web application that predicts the HDI of countries using key development indicators. The solution offers a simple interface where users can select a country and instantly view its HDI score, category, and

Section

Description

related indicators, enabling faster analysis, improved decision-making, and a better understanding of global human development.

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? I.e. working parents of 0-5 y.o. kids	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? I.e. spending power, budget, no cash, network connection, available devices.	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? I.e. pen and paper is an alternative to digital notetaking.	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? I.e. customers have to do it because of the change in regulations.	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? I.e. directly related: find the right solar panel installer, calculate usage and benefits; Indirectly associated: customers spend free time on volunteering work (I.e. Greenpeace)	
Identify strong TR & EM	3. TRIGGERS TR What triggers customers to act? I.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7	Extend online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? I.e. lost, insecure > confident, in control - use it in your communication strategy & design.		8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.
