

Project Design Phase-II

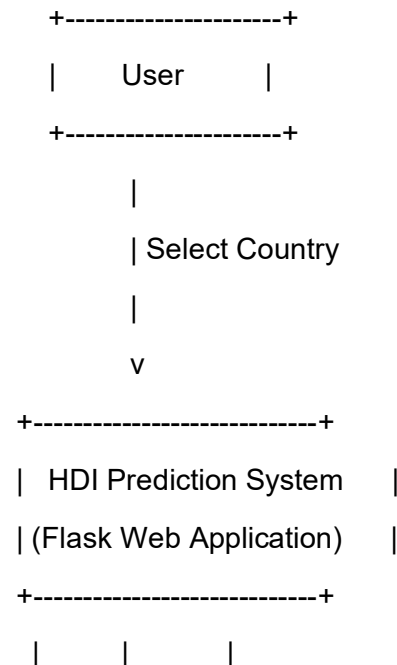

Data Flow Diagram & User Stories

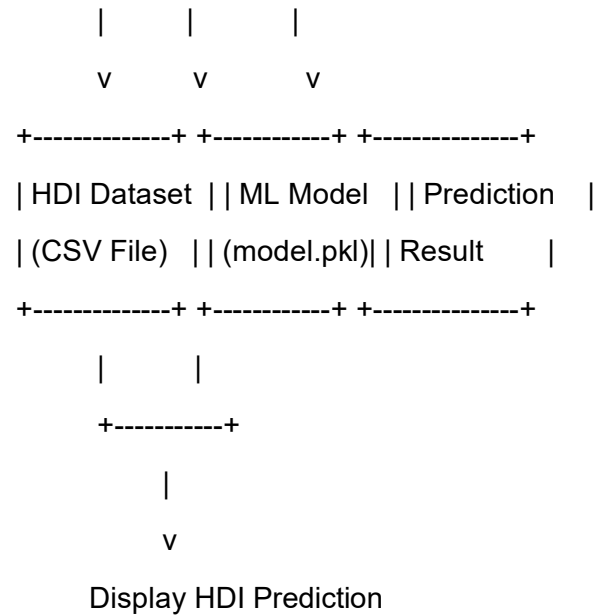

Date	18 july 2026
Team ID	
Project Name	A Comprehensive Measure of Well - being
Maximum Marks	4 Marks

Data Flow Diagrams:

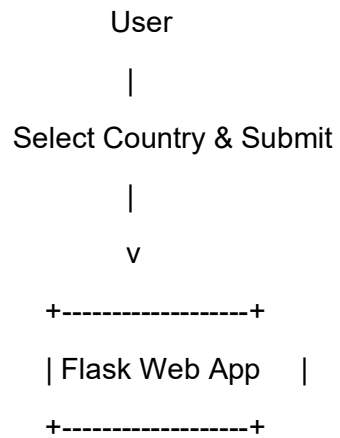

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

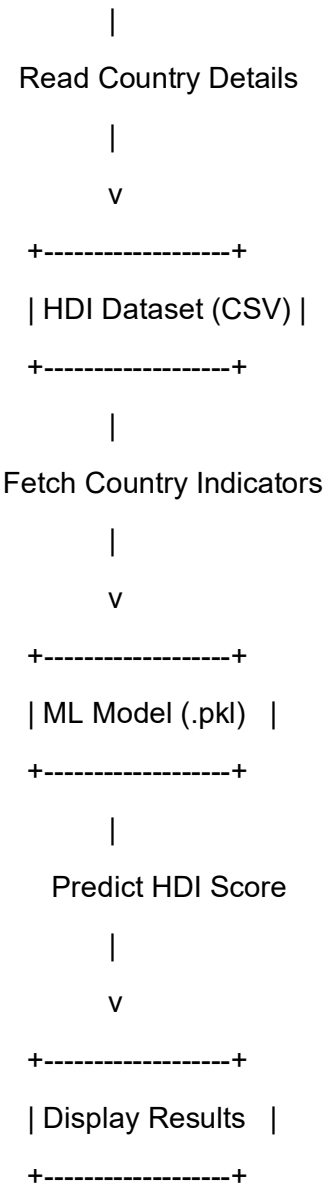

1. Data Flow Diagram (DFD - Level 0)

2. Data Flow Diagram (DFD - Level 1)

3. User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Web User	Home Page	USN-1	As a user, I can open the HDI Predictor website.	Home page loads successfully.	High	Sprint-1
Web User	Country Selection	USN-2	As a user, I can select a country from the dropdown list.	Selected country is displayed correctly.	High	Sprint-1
Web User	Prediction	USN-3	As a user, I can click the Predict HDI button.	HDI prediction is generated successfully.	High	Sprint-1
Web User	View Indicators	USN-4	As a user, I can view Life Expectancy, Mean Years of Schooling, Expected Years of Schooling and GNI Per Capita.	Country indicators are displayed correctly.	High	Sprint-1
Web User	HDI Result	USN-5	As a user, I can view the predicted HDI Score.	Accurate HDI score is displayed.	High	Sprint-1
Web User	HDI Category	USN-6	As a user, I can view the HDI category (Low, Medium, High, Very High).	Correct category is displayed.	High	Sprint-1
Administrator	Dataset Management	USN-7	As an administrator, I can update the HDI dataset.	Dataset is updated successfully.	Medium	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Administrator	Model Training	USN-8	As an administrator, I can retrain the ML model with updated data.	New model is saved successfully.	Medium	Sprint-2
Administrator	System Maintenance	USN-9	As an administrator, I can maintain the application and dataset.	Application functions correctly after maintenance.	Low	Sprint-3

Example: [\(Simplified\)](#)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.
